

# Project Links

This document provides quick access to the main environments for this project.

## Frontend (Next.js – Vercel)

The frontend application is built with **Next.js** and hosted on **Vercel**.

- **Production URL:** <https://fenero-frontend.vercel.app/>
- **Framework:** Next.js
- **Hosting Provider:** Vercel

This site serves the public-facing user interface and consumes data from the CMS/API as needed.

---

## CMS / Backend (WordPress – Hetzner)

The CMS is powered by **WordPress** and hosted on **Hetzner**.

- **Admin URL:** <https://webstaging.fenero.ie/wp-admin>
- **Public URL (if applicable):** <https://webstaging.fenero.ie>
- **Hosting Provider:** Hetzner
- **Role:** Content management, API source for the frontend

The WordPress instance is used as a headless CMS and connects to the Next.js frontend.

---

## Notes

- Frontend deployments are managed via Vercel (CI/CD on main branch).
  - WordPress hosting and server management are handled on Hetzner.
  - Environment variables and API keys are configured per environment.
